

Harben truck mounted 300 to 700 gallon jetting packages can be fitted to a variety of diesel engine truck chassis up to 19,000 lb. GVW weight range.

**Harben ...  
Long On Performance  
HIGH PRESSURE/LOW FLOW  
PERFORMANCE**

Harben 300 to 700 gallon truck units allow up to 50 minutes of jetting time at 4,000 psi from a single fill of water. Equipped with the efficient Harben Radial Piston Diaphragm Pump, these are the most reliable jetting units available in their class.

**VERSATILITY**

In addition to drain and sewer cleaning, including the removal of roots and grease, Harben truck mounted jetting units are capable of carrying out a wide variety of other jetting applications using a wide range of Harben accessories.

- ◆ Evacuation of water and solids from sumps, manholes and basements with the Harben Jet Pump.
- ◆ Graffiti removal using Harben dry abrasive injector.
- ◆ Surface and floor cleaning with the Harben Hoverclean.
- ◆ General cleaning and jetting tasks using the Harben MK2 safety gun with zero tip and fan jet nozzles.
- ◆ Pipe and tube descaling with a wide range of flexible lances and nozzles.

**Features:**

- ◆ 5 year warranty on P-Pump
- ◆ Unique Harben Radial Piston Diaphragm Pump
- ◆ Continuous run dry design
- ◆ Large capacity hydraulic hose reel
- ◆ Two lockable toolboxes (9.3 cu. ft. each)
- ◆ Durable polyethylene water tanks

**Options:**

- ◆ Harben Jump Jet pulsation system
- ◆ Work and safety lights.
- ◆ Antifreeze recirculation system
- ◆ Mini Jet Kit w/flow diverter
- ◆ Pull out pivoting hose reel
- ◆ Wireless remote for one man operation
